ABOUT US

PROJECTS

REFERENCES

Distinguished in the field of architecture and interior design in the construction, building and decoration sector since it was founded in 2000, Ax Yapı Tasarım has been providing project and application services.

Our firm which analyzes design, project and application services in an integrated manner, has been working on presentation techniques that are creative, research-oriented and meet the needs of the times since its foundation.

Our company carries out operations through the Project-Coordination Office with its refined expertise of architectural team; as well as the Application Office with highly skilled installation and technical crews.

Besides the design and project phases, we handle mechanical and electrical projects that include technical services.

With our special applications to individuals and institutions, our company, which can manufacture from a to z in the construction sector, continues to produce solutions to its customers without sacrificing aesthetics and quality.

WHAT WE BELIEVE?

Using architectural design with the right design approaches to achieve the best possible outcome is crucial in order to maximize the output of the revealed work. We are aware of this prejudice and we believe that it will take us a step further by adopting an understanding of design that is open to change without being bound to the new and the old. Our goal is to show that the designs we offer to our customers in the digital environment meet the different expectations, while in the application phase the dreams can be transformed into reality.

HOW WE WORKING?

As Ax Yapi Design, we act as creative, practical and disciplined as possible in accordance with the basic requirements of spaces in project design. Our working style is very simple and effective. We offer the most appropriate creative solutions to your requests and to your target in line with our brief studies with the customer. By creating a balance with the form and function emphasis that is important to us and blend our architectural technical knowledge and skills in the most practical way possible.
